

## Data Sheet

Updated 2018-11-17

# C10 Intercom master and C11 slave

Modules for VAKA with intercom

## Functions and application

- The C10 master module is mounted at one door where intercom is desired. The C11 slave module is mounted at the other doors where intercom is desired.
- The calls are IP based which means that the internet is used call the receiver's cell phone, home phone or company switch.
- Only one IP phone subscription is required for all phones. The system can handle five simultaneous calls. Axema will assist when signing up for an IP subscription.
- Connect the VAKA system to Gigaset for wireless hand sets without any call costs
- If an existing analogue phone subscription is to be used An ATA box that converts IP telephony to the analogue phone network is required.
- Internet connection with a VoIP subscription.
- VoIP via standard SIP protocol.
