C12 Audio Module

C12 allows VAKA to play messages through external speakers.

Functions and application

- The audio module is used to connect speaker to play the voice messages "The alarm will activate in X minutes", during the set warning time (for example, five minutes).
- Outputs for active and passive speakers.
- The voice messages can be configured to be played in one or more alarm areas.
- High level output, 4-8 Ohm, 3 W.
- Low level output, for PA-systems or similar.

Technical Data

Attributes	C12
Housing	Plastic
Power Supply	From door controller
Temperature	0° to + 55°C
Article number	2-3120
E number	E5870429

Wall mounted speaker

Attributes	C12 Speaker
Dimensions	250x190x110
Housing	White wood
Mounting	Wall mounting
Temperature	-10° to + 50°C
Impedance	8 Ω
Article number	2-5020
E number	E6221354
