

MICROPHONE BASES

IPG12, IPG24, IPGE06, IPGE18

Depending on the model, Inim Electronics microphone bases can be used for voice announcements in PA systems (Public Address systems) in non-emergency conditions, or for the management of internal evacuation communicated through a voice emergency system. They are equipped with configurable buttons for selecting zones or sound sources as well as LEDs that report the status of the associated zones.

They must be connected to the IFAMEVAC audio matrix module of the Previdia control panel via cat. 5E SF/UTP cable on the two distinct lines (A/B PAGER lines). They also receive power from these lines, which can also be supplied by an optional external 24V power supply.

MAIN FEATURES

- Connection to the IFAMEVAC module through two distinct lines via cat. 5E SF/UTP cable
- Maximum 64 microphone bases for each line
- Power supply from line (maximum 1A) or by local power supply (IPS24024DT)
- Configurable buttons for the selection of groups of audio zones or for retrieving pre-recorded message
- Signalling LEDs for each configured zone
- XLR 3P receptacle connector for microphone
- Voice filter option ("speech filter")
- Layout for recessed installation on counter spaces

AVAILABLE MODELS

IPG12

- 12 configurable buttons
- Audio start button disengages on release of button
- Audio start button actuation maintained until pressed again

IPG24

- 24 configurable buttons
- Audio start button disengages on release of button
- Audio start button actuation maintained until pressed again

IPGE06

- 6 configurable buttons
- Audio zone status LED indicators (alert, fault, bypassed)
- Audio start button disengages on release of button
- Audio start button actuation maintained until pressed again
- Buttons and LEDs with emergency evacuation functions (as per Previdia control panel)
- Can be housed in an IPGECAB-S metal cabinet

IPGE18

- 18 configurable buttons
- Audio zone status LED indicators (alert, fault, bypassed)
- Audio start button disengages on release of button
- Audio start button actuation maintained until pressed again
- Buttons and LEDs with emergency evacuation functions (as per Previdia control panel)
- Can be housed in an IPGECAB-D metal cabinet
