Outdoor Security with Artificial Intelligence

Reconeyez is an **outdoor security solution** that uses advanced algorithms and software to detect motion and potential threats.

Initially designed for the border guard and the military, our systems are now used commercially in **more than 50 countries worldwide**.

How does
it work? >>

Features

Rapid deployment

Remote device management via Cloud

Fully wireless communication

HD image resolution

Rugged build quality, IP67-rated hardware

Long battery life

Reconeyez products are quick to install, simple to scale, easy to operate, and economical to maintain. All our devices are developed, built, and assembled in the EU.

Devices

1 Detect

The Detector

- Passive infrared (PIR) sensor combined with signal analysis
- Developed for and tested in the harshest possible conditions: **-40°C to +60°C / -40°F to 140°F**
- **1920×1080** pixels day photo / **1280×960** pixels night photo
- Working without human intervention for **up to 400 days**
- Contained in a tough and rugged **IP67-rated** enclosure

The Bridge

- **Autonomous, secure,** and **robust** 4G communication gateway, connects Reconeyez hardware with Cloud
- **Battery, mains,** or **solar** powered

2 React

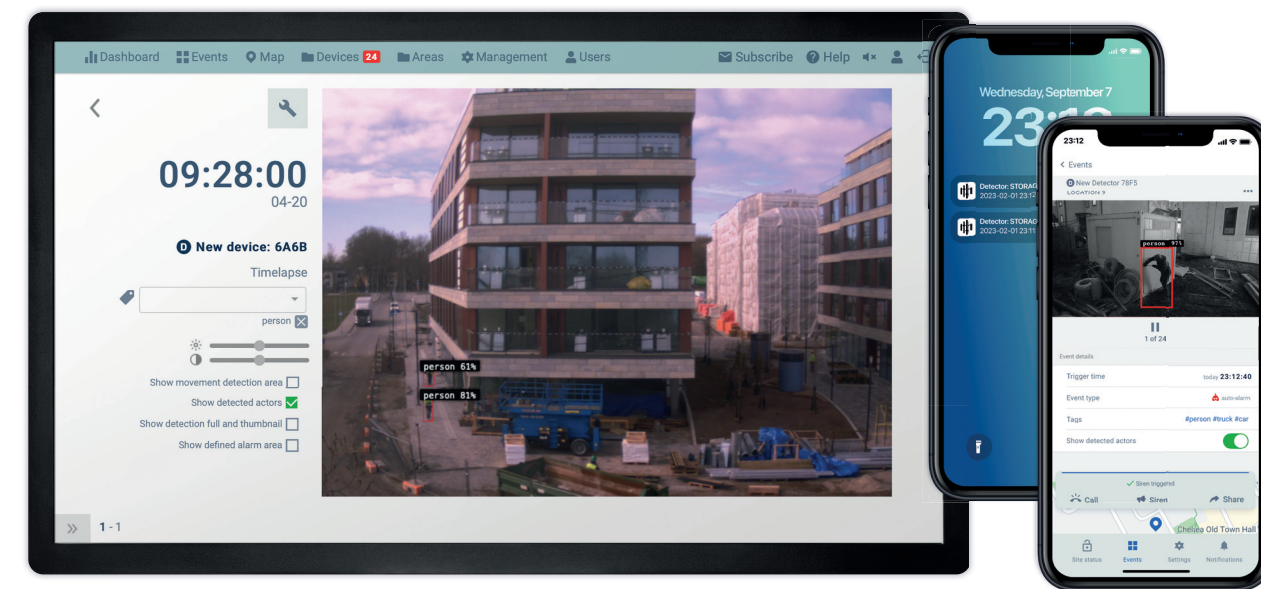

The Siren

- **108 dB** sound
- Red directional **beacon**
- Triggered **automatically** or **manually** from the Cloud or Reconeyez app
- Contained in a tough and rugged **IP67-rated** enclosure

Software

3 Protect

Cloud

- **Artificial Intelligence** identifies objects on alarm photos
- **False Alarm Assistant** stops false alarms from reoccurring
- **Manage** your sites and devices **from a distance**
- **Dashboards** for quick analytics

Reconeyez app

- Delivers alarms straight to your mobile device with **push notification**
- Customizable notifications
- Easily **arm/disarm sites** on the go
- **Share alarm footage** with just a click
- Instantly call the **predefined security number**
